

CASE STUDY

How a homeowner in Moorpark used RST CleanTech to make his solar panels more productive – and put an end to having people on his roof.

up to
30% increase
in production

No hassle – automated panel cleaning system

Prevents panels from getting dirty

Increases production and reduces true-up bills

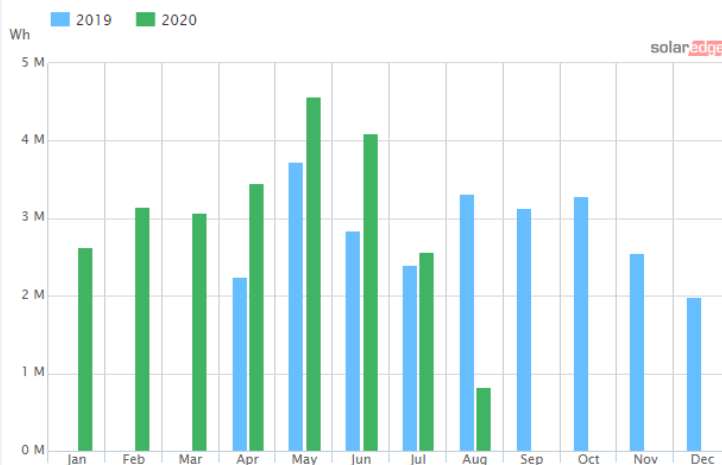

Protects panel warranty

Keeps people off your roof

Protects from wildfires

Paul Teagle installed RST on March 2nd, 2020. Data taken on August 12th, 2020. One inverter stopped functioning on July 7th.

"We have seen our monthly electricity bill drop a lot. My true-up bill will be much smaller this year because of RST. I am glad RST is protecting the panel warranty while also keeping people off my spanish tile roof. And being near a open grassland area, it feels good that I can run RST to ward off wildfires if needed."

– Paul Teagle
