

**PROJECT TYPE:**  
Residential

**SYSTEM TYPE:**  
81 panels @ 15° tilt

**LOCATION:**  
Woodland Hills, CA

## Do your solar panels no longer cover your electric bill?

- Increase production fast and simply while protecting panel warranties.
- Increase production for pennies on the dollar compared to adding additional solar panels.
- Offset increased electrical usage that wasn't considered when solar was installed.
- Reduce your true-up bill.

"My electrical load has increased over the years since getting several electric cars, and my true-up bill was getting larger and larger. The RST system really increased my production! Not only did it offset the additional electrical usage from charging, it also lowered my true-up bill. We are happy with the RST system"

- Rick Deckman
